

The flyer for printing is on Page 2 of this PDF file. Page 3 has full printing instructions. Please follow them carefully to insure your flyer will bring correctly.

No child is safe from Polio while it exists anywhere in the world

- ◆ Many children are still not immunized
- ◆ Polio needs no Visa to enter a country
- ◆ 1.2 million members of Rotary are working globally to end polio forever
- ◆ Just 60¢ immunizes a child for life against polio

During the month of October, your child's school will be participating in the "Pennies for Polio Campaign" in cooperation with your local Rotary club(s). Rotary International has committed to eradicating polio worldwide to insure that no child will be at risk. The job is more than 99% complete and now Rotary needs everyone's help to reach 100%. Please help Rotary make the world polio free forever by contributing your change to the "Pennies for Polio" campaign at your child's school throughout the month of October. Working together we can "END POLIO NOW".

Instructions for printing

1. Determine how many flyers you are going to need. If you need 2500 flyers you'll only need to 1250 sheets because the template is designed to print 2 to a page.
2. **PRINT IN BLACK AND WHITE ONLY.** Do not print it color. Too expensive and not necessary. This is a flyer
3. Instead, use **YELLOW** colored bond paper. This template has been tested on every color and **YELLOW IS THE BEST** because it is the easiest to read. You many choices (work with your printer) but the "brighter" the yellow the better (it will be more eye-catching that way. Some Examples are: Astro-Bright (Solar Yellow); FireWorx (Banana Blast). This is the best value. Again, work with your printer.
4. Have the printer cut the sheets for you as part of the print job.
